## Chemtrails - Frequently Asked Questions

By Toni Thayer - <[blueskiesintl@hubwest.com](mailto:blueskiesintl@hubwest.com)>  
Executive Director, Blue Skies International  
10-14-00

What's the difference between a jet contrail and a chemtrail? According to the U.S. Air Force, jet contrails form above 33,000 feet when hot engine exhaust momentarily condenses ice crystals into pencil-thin vapor trails that quickly vanish like the wake behind a boat.

Chemtrails (CTs) look like contrails initially, but are much thicker, extend across the sky and are often laid down in varying patterns of Xs, tick-tack-toe grids, cross-hatched and parallel lines. Instead of quickly dissipating, chemtrails expand and drip feathers and mare's tails. In 30 minutes or less, they open into wispy formations which join together, forming a thin white veil or a "fake cirrus-type cloud" that persists for hours.

In August 2000, chemtrail watchers began to report "more normal" appearing or nearly invisible jet sprays. However, these reports go on to include cloud formations dripping the feathers and mare's tails just as the chemtrails do. It is our belief that the operation has adjusted the chemtrail mix as word about the phenomenon is spreading and as more and more people are looking up. Observant chemtrail watchers continue to see the "fake cirrus-type clouds" on top of and

surrounding real cumulus clouds.

Who is doing the spraying? Witnesses have documented and photographed military KC-135s and KC-10s and white, unmarked jets. Airport personnel and pilots have also confirmed specific commercial airliners to be leaving the long lasting chemtrails.

What's in the chemtrails, and why are they spraying us? We wish we knew. There are only a few planes in the world that have the equipment to analyze the spray mix and can get to the CT altitudes, clearance must be obtained to fly into the trails and money must be raised for the \$22,000 per day plane rental fee.

There may be several programs working at the same time. Possibilities include atmospheric and weather modification and biowarfare. Many theorize that it is part of a clandestine operation to implement the New World Order (NWO) by eliminating society's "useless eaters" and the infirm and/or to reduce the population to a support level for the "elite". Originally, it was thought to be mass inoculation for possible biowarfare attack; this theory has been ruled out with the increase of sicknesses and illnesses in the CT paths.

Edward Teller's (inventor of the hydrogen bomb) proposal to reduce global warming to the U.S. involves spraying minute aluminum particles to deflect the sun's harmful ultraviolet rays but still allow the Earth's heat to rise through them. This seems to be supported by rainwater tests after heavy spraying in Espanola, Canada which contained 7 times the allowable limit of aluminum. In this instance, the areas with the least ultraviolet protection, as in the Southwest, would be the heaviest sprayed. Most often, this does not seem to be the case.

Generally, spraying increases as clouds build. Chemtrails may be the reason that over half the world and over half the U.S. have been experiencing drought for the past 2 years. Witnesses have reported watching chemtrails fall through cumulus clouds, leaving the real clouds "skinny"

and within a few minutes totally gone. Typically, storm clouds build and mix with the chem ingredients, resulting in a grey, uniform "mucky" sky which doesn't rain. The real clouds disappear, leaving behind the chem formations which were on top of the storm system.

Another possibility is barium salt mixtures. The Variable Terrain Radio Parabolic Equation (VTRPE) shows pilots what nearby radar systems can and cannot see under different terrain and atmospheric conditions. It was tested and perfected after aerosol barium titanate salt mixture was released from military aircraft, forming chemical trails in the atmosphere across America. Barium salts were also used in Libya, Panama and Desert Storm where they were sprayed and exploded overhead to make the people extremely sick and weak. It is a radioactive material that accelerates and magnifies the effects of other mix ingredients by altering the chemical structure of the other agents. A spectrum analysis reveals only the barium compounds and hides the "bad stuff" by placing a shell around it. After time, it releases the other agent. Think of it as a time release death pill.

What do the governments say about Chemtrails? No governmental agency of any country will confirm that spraying activity is occurring. Most often requests are ignored. The U.S. Air Force has explained that they routinely dump fuel over populated areas to reduce weight prior to landings. More recently, the Environmental Protection Agency states that it may be pesticide spraying. Generally, officials explain it away as increased commercial jet traffic. However, this does not explain why areas with no commercial flight paths overhead are also seeing these long lasting plumes. Some citizens have been told by government "to keep it quiet".

Why would our government authorize such a program when they live here too? Money talks and corporate dollars influence our legislators and officials. In 1997, the year of disasters, insurance companies paid \$92 billion in weather disaster-related claims. Teller stated that his weather modification program would cost only \$1 billion per year. Research into a NWO takeover reveals a heavily funded and incredibly powerful elite group of

individuals that most are afraid or unwillingly to go up against. We also know that informed citizens can take precautions to offset the effects of CT spraying by limiting time outdoors on spray days and by building their immune systems with vitamins, herbs, Colloidal Silver and other therapies.

Why do you think the cirrus clouds in the sky aren't real? Cirrus clouds are high altitude clouds, formed above 20,000 feet and consist of ice crystals. They precede a storm or are in the jet stream. Cumulus clouds are formed in lower altitudes, 6,500 to 20,000 feet. These 2 cloud formations are seen together at the lower altitudes of 9,000 to 15,000 feet in extreme drought conditions. This goes against the laws of nature. Also significant is the "white ground haze" that can be seen from horizon to horizon with clear blue sky overhead.

How long has this spraying been occurring? Cloud books confirm that tests have been conducted since the 1960s. Old photographs show sporadic CTs dating to the early 1970s with the activity steadily increasing throughout the 1980s. Since 1998, citizens throughout the world have documented spray patterns on a nearly daily basis, with an average of 1 "clear" day per week. We have all become accustomed to these changes as they've been introduced bit by bit and have presumed them to be normal. Younger generations have never seen normal weather and clouds.

Do they spray us here? They have been spraying most areas intensely in the U.S., Canada, Europe and England since 1998, including areas with no commercial flight paths overhead. Recently, Australia, Mexico, South Africa, Bahamas, Puerto Rico and Croatia have reported chemtrail spraying.

Why should we be so concerned about Chemtrails? A "flu-like" epidemic is on the rise which the Centers for Disease Control says may be due to some "unknown pathogen". From their May 6, 2000 Influenza Summary Update, 11 out of every 100 newly dead people have died from this "Influenza-Like Illness", but 99% of sick patients have tested negative for the flu. The most

prevalent symptoms reported by witnesses in the wake of these white plumes are: Persistent hacking coughs, upper respiratory and intestinal distress, pneumonia, extreme fatigue, lethargy, dizziness, disorientation, splitting headaches, aching joints and muscles, nosebleeds, diarrhea, bloody stools, depression, anxiety, loss of bladder control and nervous tics. The elderly, young and those weakened by disease or in poor physical condition are the first to feel the CT effects.

Why should I join Blue Skies International? Chemtrails is a program that affects the world, its climate, its citizens, and our children s heritage. The spray program is blatantly right before our eyes. Blue Skies, a newly-formed, concerted citizens effort, is seeking Answers, Action and Accountability from our governmental leaders. The more members we have, the more clout we have.

All donations and membership fees go towards informing the world s residents and continuing research. As a "public" charity, Blue Skies depends upon public funding to provide our services: Educational packets, web page, speakers, news articles, research and governmental communications. Our contact information is at our temporary website:
